Item   1.1

Contract No.: SS8181-5/14-5	Title: SCADA Radio System

Type of Change
☒ Additional Time   ☒ Additional Expenditure Authority

Contract Description and Reason for Change:

Authorization is requested to amend this sole source contract to add an additional five years as a legacy contract to allow, as attached, the Water and Sewer Department (WASD) to continue purchasing the support required for the supervisory control and data acquisition (SCADA) Radio System. The SCADA system is used to monitor and control the pumping infrastructure of the water treatment, water distribution, sewer collection and wastewater treatment systems. The radio system communication is required to effectively cover 43 square miles within the boundaries of Miami-Dade County. The SCADA radio system works in conjunction with the SCADA process system to effectively monitor and communicate between stations and as part of the Pump Station Optimization Program, the department is consistently expanding and upgrading the current system.

WASD must properly maintain its SCADA systems to comply with the mandates and agreement requirements issued by Federal Consent Decrees, the Florida Department of Environmental Protection, and the South Florida Water Management District. Consent Decree regulations mandate that the vast majority of the 25 year old system components be .upgraded and replaced.

The contract is currently in its last option to renew term for system support services. The support required includes hardware, software, parts, programming service applications, support services, workstations, repairs and ongoing staff training. The SCADA system is proprietarily developed and owned by GE MDS LLC. No other vendor is capable of providing all of the required software, hardware, or support services. The value of the five-year extension is $2,100,000, which is based on current and anticipated usage during the extension period. The increased allocation is needed because the legacy system is 25 years old and radio upgrades and replacements have been deferred over the past ten years due to budget constraints. The allocation will be used to support the existing infrastructure and purchase additional equipment on an ongoing basis to satisfy the requirements of the Consent Decree.

Contract No.: BW8970-4/14-4	Title: Artists and Exhibition Services

Type of Change:

☒ Additional Time   ☒ Additional Expenditure Authority

Contract Description and Reason for Change:

Authorization is requested to extend this pool contract for an additional five years and increase expenditure authority to allow Miami-Dade Public Library System (MDPLS) and Miami-Dade Aviation Department (MDAD) to continue purchasing artist and exhibition services. The value of this five-year extension is $325,000 which is based on current and anticipated usage during the extension period.

This pool is used by MDPLS and MDAD to procure art, art installation services, performers, conservation services, art consultants, exhibitions, and exhibition-related services. The art, presentations and exhibits provide community access to free artistic programs and cultural events.

Through this pool, the County can procure specific cultural services, which are unique in nature and cannot be acquired through the County's traditional competitive bidding process. A selection committee composed of departmental staff, and arts and culture community representatives, as necessary, conduct market research to identify and select companies and individuals offering distinct art and exhibits.
